"THE COIN MACHINE MERRY-GO-ROUND"

BY BILL GERSH

REVIEW

This past week we received a letter from one of the South's leading distributors which had an outline of why he felt the Indoors Entertainment Conference should be hurried up. He pointed out, in this letter, that with the states losing revenue that the legislators are definitely bound to turn to other sources for finance. For some weeks now we have been reporting on the losses of revenue endured by the eastern seaboard states. We reported that New York State lost over 13 MILLIONS in the month of September on gasoline taxes alone. This same, in proportionate amount, will happen to all other states everywhere in the country now that gas rationing has become national. We also pointed out many issues ago, the effect of general rationing and lease-lend on the average retailer and that as his shelves became bare of the merchandise he had been accustomed to selling he turned desperately to other means of revenue. We also explained that coin operated equipment was today considered a very important source of revenue by the average retailer. That it was he, himself, who was helping to bring back much equipment that was formerly barred. And that because the local authorities in his community realized his predicament that they were turning their heads diplomatically away from the fact that this "barred" equipment was being run in his place of business. These community authorities and the economic experts of the nation realize that the small retailer (over 2,750,000 of these) is actually the backbone of the present distribution set-up for all industry. Naturally, with a great many state legislatures scheduled to meet beginning this January '43 they are, first of all, going to seek for new sources of revenue for their states - whose financial sources have been crumbling badly because of war injuries to general business. They dare not impose further tax on tax for the income of the average family is now being taxed to a fare-thee-well. But, they will definitely (in many instances) pick out such items as coin operated equipment which the Federal Government has led them into. To be further burdened by city, state and county taxes in addition to those of the Federal Government is something for the men in this industry to think pretty hard on at this time. Many changes should be made in the present Federal Tax rulings. Counter games are a potent example. The loss of these to this industry and the loss in tax from them to the Federal Government is very greatly felt by a great many people all around. Yes, a great many problems face the industry in '43. Some of these will be openly discussed in our "New Year Special" issue - but, their solution or something like an answer for solution should come at the Indoors Entertainment Conference.

FUEL OIL

A few days ago the press of the country reported from the nation's capital that there was a possibility that sports centers, casinos, dance halls, etc., might be closed during the harsh winter months if they used oil for heating purposes because of the great shortage of fuel oil expected in the eastern seaboard states. This would, no doubt, affect some Arcades, too. If the fuel oil shortage becomes acute there is no doubt that such spots as Madison Square Garden will be closed unless they rapidly convert from oil to coal. It is our hope that this will not come to pass. But, it gives some idea of the trend of thought in high places at this time regarding our all out effort. Yet, this in itself is helping the average coin machine operator. By closing down on such prominent entertainment palaces - they are actually forcing the public to relaxation much closer to home and the games on naborhood store locations will therefore enjoy even greater play than they have during '42. In short, all rationing and all restrictions upon the general habits of the public tend to lead to economic entertainment. And, as we all realize, the most economical and interesting and intriguing of all entertainment are coin operated devices.

REVAMPS

As we predicted sometime ago, revamps are growing ever more important. The reason is simply that at the present rate of play and the fact that games are actually being traded from one part of the country to the next - that something new in theory and design must be created to continue to hold the interest of the public. Therefore, revamps are becoming more and more important each day. Even when this war is over, revamping will still continue to be an important industry for a long time to come. There is no doubt (when the war ends) that raw materials will continue to be rationed. These restrictions will not be lifted badily overnight. Those industries manufacturing the greatest necessities for human life will be granted first rights to the raw materials. Gradually the restrictions will be loosened to reach all industry. In the meantime the revampers will be able to keep this industry going with new designs and new ideas of old equipment. The revampers therefore grow impressively more important each and every day as present equipment begins to show the signs of the hard wear it is receiving from the great play that it is getting. It pays to watch the revampers.

"THE COIN MACHINE MERRY-GO-ROUND"

ARCADE EXCHANGE

The Cash Box has been asked by certain Arcade leaders to create an "Arcade Exchange". Tho a great many of these Arcade men feel that they can now continue for the duration with what they have on hand, other far-seeing leaders in this field, realize that they will need to exchange machines, trade and sell to keep interest in their spots at high pitch. To maintain this present great interest in the Arcades field and to also continue it strong for a long time to come (for it may be a new development and a new outlet for the future ideas of machines in this industry) they have asked us to start an "Arcade Exchange". The plan is to sectionalize a part of The Cash Box and devote it exclusively to these men - placing their type of products and items exclusively to their interest in such a section. What do you think?

PARTS & SUPPLIES

Parts and supplies continue to grow more important by the minute. For sometime we have been using sheets of this paper advising that the very best thing the average coinman can do at this time is to carefully watch every single part that he has on hand for these will become precious as jewels as time goes on. Today, those coinmen who have made it their business to have a complete stock of parts of every type on hand (in most cases parts which they have removed from old machines) and have catalogued these parts for their own information are truly in an enviable position. Already a great many of these men are starting to cash in on the parts they have. It is with greater emphasis than ever that we urge you to watch parts and supplies carefully. Make them last. Do not just break up and throw games away. If you have an excess of parts make a list of these and use them in your free space in The Cash Box for there are others thruout the country that need them. Remember the little item we published sometime ago about one of the revampers in Chicago who was finding enough wasted solder on the underboard of each game to use for ten or twelve games by reclaiming it. Reclaim. Save. You'll be happy you did. But, do let others know what you don't need. Help each other.

THE I.E.C.

We have begun to receive the first batch of the "outside vote" for the Indoors Entertainment Conference. (These are the 1,000 ballots which The Cash Box mailed at its own expense to leading active people in this business thruout the country to get their opinion on the Indoors Entertainment Conference.) So far, even with New York creeping steadily up on the big lead which Chicago has - Chicago is still in front and the 3rd week in January seems to be the time everyone wants. (More votes, tho, are now beginning to come in for the 1st week in February). Frankly, we aren't as yet completely satisfied. We just do not feel that undercurrent of unanimous enthusiasm for the I.E.C. that should be forthcoming. The Indoors Entertainment Conference is really and truly YOUR conference. It is the one opportunity that YOU will have to get together. Meet with each other again, discuss plans and problems and general conditions. It is the one big event of great importance to you. There may be no other if the war does go on for the long period our leaders predict. If you really want the Indoors Entertainment Conference then, by golly, say so - OUT LOUD.

SEASONAL DIPS SLIPS

For a great many years the trade was told by all and sundry that it could expect a "seasonal dip" in take around the Holiday season. Which means - from Thanksgiving to Xmas. But, this Holiday season of '42, finds these seasonal dips refusing to dip. The take is not only holding up but if all reports we have received are true, it is even continuing upwards in certain sectors of the country. It is a well known fact that the average coinman looks to relax a bit around Holiday time with his family and friends and a few have even used this period as an excuse to get away to some sunny clime for a while. But, with action what it is and with the necessity for staying on the job greater than ever before because of lack of help even coinmen will be working with turkey in one hand, wine in the other and cash arollin' in.

PIN GAME REBIRTH

While all other types of equipment were going lickety-split the pin game men were crying. Yes, they were. Great, big crocodile tears, too. Tho we kept hammering away at the fact that with new equipment scarcer than hen's teeth - the trade would eventually get back to the good old pin game - these men refused to believe us. In fact, over in St. Louis, I can safely say a few of them thought we were nuts. But, the pin game has come to a day of rebirth again. Sales are going greater than ever. Of course, everyone is gobbling up the better games first. But, the action is there and is getting more heated every passing day. And, while we're on this subject (which is another prediction come true) let us (with all modesty) recall that while things were getting better we predicted that when the cold weather would definitely set in - all equipment would be in terrific demand and price paid would be far above anything quoted at the time. And this prediction has also come true.
